

ZIVOFIT FINANCIAL FORECAST & MATH MODEL

On-Device AI Engine & Cloud Synchronization Cost Analysis (Play Store 15% Cut)

1. Core Assumptions & Parameters

This document details the financial math model for the ZivoFit mobile application. Calculations are computed assuming an exchange rate of **1 USD = 94.42 INR**. Calculations assume an active user profile executing **15 scans/day** (mix of barcode searches, plate scans, OCR fallbacks) and **20 database syncs/day** using **Gemini 2.5 Flash Lite** pricing models. Payouts are calculated assuming the Google Play Store commission is **15%** (removing the 30% tier). Operating costs incorporate a raw AI cost (2.29 INR/month) added to a flat operational and cloud sync cost buffer of **25.00 INR/month (300.00 INR/year)** per user, resulting in a total operating AI cost model of **27.29 INR/month (327.88 INR/year)**.

2. AI & Cloud Sync Daily Cost Breakdown

Scan/Operation Type	API / Backend Used	Cost per Occurrence (INR)
Meal Plate Scanner (Visual)	Gemini 2.5 Flash Lite	0.0052 INR
Standard Barcode Scanner	OpenFoodFacts API	0.0000 INR (Free)
Product Text Structured Fallback	Local OCR + Gemini	0.0057 INR
Visual Product Label Identification	Gemini 2.5 Flash Lite	0.0081 INR
Deep Ingredient Analysis (Vision Lens)	Gemini 2.5 Flash Lite	0.0145 INR
Cloud Syncing (20 syncs/day)	Firebase Firestore	0.0045 INR

Total AI & Buffer Operating Cost per User: 0.910 INR/day | 27.29 INR/month | 327.88 INR/year

3. Payout Deductions Flow (Taxes & 15% Play Store Commission)

Apple and Google Play in-app purchases in India are subject to **18% GST** (automatically collected) and **1% TDS** under Section 194O. The breakdown below details the remaining payout after a **15% Play Store commission**:

Plan Type	GST (18% inclusive)	1% TDS (on gross)	15% Store Cut	Net Store Payout
Monthly (169 Rs)	-25.78 Rs	-1.69 Rs	-21.48 Rs	120.05 Rs Payout
Yearly (899 Rs)	-137.14 Rs	-8.99 Rs	-114.28 Rs	638.59 Rs Payout

4. Final Net Profit Matrix (Per 1 User & 1,000 Users)

A. Single User Payouts (After Store Cuts & AI + Buffer Cost Burn)

Plan & Commission	Gross Payout (Store)	Total AI/DB Cost Burn	Final Net Take-home
Monthly Plan @ 15% Cut	120.05 Rs	-27.29 Rs	92.76 Rs / mo
Yearly Plan @ 15% Cut	638.59 Rs	-327.88 Rs	310.71 Rs / yr

On-Device AI Engine & Cloud Synchronization Cost Analysis (Play Store 15% Cut)

B. Scaled Payout (For 1,000 Active Users)

Subscribers Tier	Gross Gross Revenue	Total Operating Burn	Your Net Profit
1,000 Monthly @ 15% Cut	169,000 Rs	-27,290 Rs / mo	92,760 Rs / mo
1,000 Yearly @ 15% Cut	899,000 Rs	-327,880 Rs / yr	310,710 Rs / yr
